

Product Code . JLI-CLE-10547

Basic Kit, Student, Microscience

Description

The development of the Comboplate inspired other developments in physical apparatus that allow students the opportunity of performing over a hundred chemical experiments previously requiring macro-scale apparatus.

Topics that may be covered with this kit include:

Chemical Equilibrium

Enthalpy Changes

Reactivity of Group 7 Elements

Industrial Pollution

Acid Base Chemistry

Rates of Reaction

Diffusion

Solubility of Sulphates in Water

Stoichiometry

Reactions of Metals & Their Salt Solutions

Technical Specifications:

Component design based on equipment used for modern laboratory techniques

Comboplates dishwasher safe

Kits designed for individual use or in small groups

Kit components all available for separate purchase

Kits made of durable, washable materials

Worksheets written for the students and suited to the curriculum

Workbooks and guides must be ordered separately
