

Educational Lab Equipments

Product Code . JLI-BLE-10589

Visualising Osmosis & Diffusion Investigation

Description

Vividly demonstrate selective permeability using coloured solutions. The class will also learn how osmosis and diffusion permit the maintenance of equilibrium through the passive transport of water through the cell's semipermeable membrane. Starting with a model cell and a mixture of special dye solutions, your students will observe how the cell's membrane allows one dye to pass, while the other remains within the cell. The resulting colour change provides a vivid demonstration of selective permeability and how the cell absorbs nutrients and discharges wastes. Class size - 40 students
