

Product Code . JLI-BLE-10710

Lung Volume Kit, set of 4

Description

Lung Volume Kit, set of 4 used to measure vital capacity, the volume of air a person can expel after taking the deepest possible breath.

Technical Specifications :-

Comparisons can be made between a persons lung volumes and such factors as height, age, phusical activity and smokin h habits. The volume of air trapped in the bag is measured in litres and for all practical purposes represents a person`s lung volume, though a small portion of air always remains in the lungs.
