

## Description

---

The materials can be used to investigate random and selective sampling - binomial expansion - and binomial distribution.

The kit contains a Binostat with 150 balls - 6 sampling bottles (3 with long tubes and 3 with short tubes) - sampling beads - 24 dice - 6 large dice shakers - 1 set of playing cards - and a manual on probability.

This comprehensive kit allows students to test and actually put the theory of probability into practice.
