

Educational Lab Equipments

Description

This adventure simulation provides your students with a wealth of opportunities to apply mathematical ideas - rules and procedures to stimulating situations and problems.

Set in an alien pyramid on Mars - this challenging problem solving adventure will encourage your students to use inquiry - discovery and verification to develop skills in problem solving techniques.

A fantastic way to involve your primary and secondary students in problem solving.

Practice mode providing direct access to all problems instantly.

This allows you to direct students to problems in selected strands - without being involved in the game.

Any problem may be printed - providing homework or classroom exercises.

A teacher report allows student progress to be monitored and printed.

Complete with site license - teacher resources and life-time upgrades.

Contains 80 graphics based problems to solve while they make their way through 4 maze like levels.
