

Educational Lab Equipments

Description

Introductory Microbiology Kit

This kit is designed to give an introduction to Microbiology studies. A workbook is included. The kit allows for 10 groups of students working individually or in groups. The kit has been developed

to give a thorough understanding of all the practical

activities that would be conducted in a 'real life' microbiology laboratory thus introducing students to the importance of this critical field of study.

Activities included are: Making broth cultures, effects of temperature, Making plate cultures, Antibiotics and their effects on cultures, Staining, Pasteurisation, Living bacteria study, Study of fungi, Life cycle of Mucor and many other activities and applications.
